Reason

Do the computer-based exams that are **increasingly prevale education** measure skills and knowledge as accurately as trad paper-based tests?

With news that millions of students who took PARCC exams by computer tended to score worse than those who took the same exams with paper and pencil, it's a technical question that is again getting heavy scrutiny.

Earlier this month, officials from the multistate Partnership for the Assessment of Readiness for College and Careers acknowledged to *Education Week* that there were discrepancies in scores across different formats of its exams.

Comparing Paper and Computer Testing: 7 Key Research Studies: https://www.edweek.org/ew/articles/2016/02/23/comparing-paper-and-computer-testing-7-key.html

In a report from Carnegie Corporation of New York, Steve Graham stated, “My review of four scientific studies showed that students with little experience using computers as an assessment tool scored 18 percentile points lower than when they composed their essays using paper and pencil” ”

Steve Graham, Professor of Leadership and Innovation, Arizona State University

Data

- Real time Data
- Partial credit for multi-step problems.
- Tracks the amount of time it takes to answer each question
- Download reports
- Match Standards and keeps track of which Standards were met

Edulastic

Technology-enhanced items (TEI) are computer-delivered items that include specialized interactions for collecting response data. These include interactions and responses beyond traditional selected-response or constructed-response.

Edulastic provides a wide range of Technology-Enhanced Items, and interactive question types, that allow teachers to craft assessments that mirror the consortia online testing experience in format and rigor.

Helpful Hints

Assignment

Watch the dates, if you close it on the date, you can not just reopen it. Make it so you can assign

Assignments

When you create assignment pay attention to the tags for the Standards. You can edit and add your own tags

Google Classroom

Works seamlessly with Edulastic for entering students

Assigning

It assigns by subject and grade level so pay attention to that when you are trying to assign something to your class.

Log in

If students have had a previous account in Edulastic, they will login and then add a class
